(b) Management of financial instruments risks

In the normal course of business, the Corporation is exposed to various financial instruments risks, including market risk (consisting of price risk, commodity risk, interest rate risk and currency risk), credit risk, and liquidity risk. The Corporation's overall risk management program seeks to minimize potentially adverse effects of those risks on the Corporation's financial performance. The Corporation may use derivative financial instruments to mitigate certain risk exposures. The Corporation may invest in non-public and public issuers and assets.

9. FINANCIAL INSTRUMENTS (continued)

(b) Management of financial instruments risks (continued)

Price risk

As at June 30, 2012 and March 31, 2012, the Corporation's market risk pertaining to portfolio investments is potentially affected by two main components, being changes in actual market prices and changes in foreign exchange rates. The Corporation's sensitivity to foreign currency movements is reported below (Currency risk).

Notwithstanding these factors, the following is a summary of the effect on the results of operations of the Corporation, if the bid or ask prices of each of the portfolio investments (including investments owned, short sales and written options) as at June 30, 2012 and March 31, 2012 had increased or decreased by 10 per cent, with all other variables remaining constant:

Change in bid/ask prices of investments	June 30, 2012 Increase (decrease) in net income	June 30, 2012 Increase (decrease) in earnings per share	March 31, 2012 Increase (decrease) in net income	March 31, 2012 Increase (decrease) in earnings per share
10% increase in bid-ask prices	$ 869,048	$ 0.06	$ 199,850	$ 0.01
10% decrease in bid-ask prices	$ (869,048)	$ (0.06)	$ (199,850)	$ (0.01)

Commodity risk

The following is a summary of the effect on the results of operations of the Corporation, if the fair value of each of the open cash contracts as at June 30, 2012 and March 31, 2012 had increased or decreased by 5 per cent, with all other variables remaining constant:

Change in bid/ask prices of commodities	June 30, 2012 Increase (decrease) in net income	June 30, 2012 Increase (decrease) in earnings per share	March 31, 2012 Increase (decrease) in net income	March 31, 2012 Increase (decrease) in earnings per share
5% increase in bid-ask prices	$ 331,364	$ 0.02	$ 126,572	$ 0.01
5% decrease in bid-ask prices	$ (331,364)	$ (0.02)	$ (126,572)	$ (0.01)

9. FINANCIAL INSTRUMENTS (continued)

(b) Management of financial instruments risks (continued)

Interest rate risk

As at June 30, 2012 and March 31, 2012, Riverland Ag has a variable rate interest-bearing liability in the form of its revolving credit facility. As disclosed in Note 7 (Bank indebtedness), Riverland Ag's revolving credit facility bears interest at an annual rate of LIBOR plus 4.00 per cent. As at June 30, 2012 and March 31, 2012, management has determined the effect on the future results of operations of the Corporation, if the variable interest rate component applicable on those dates on the revolving credit facility were to increase by 25 basis points ("25 bps") as at those dates respectively, using the balance of the revolving credit facility payable as at those dates, using the number of shares then issued and outstanding, and with all other variables remaining constant. On that basis, the potential effects on the future result of operations would be as follows:

	June 30, 2012		March 31, 2012	
Change in interest rate on revolving facility	Decrease in net income	Decrease in earnings per share	Decrease in net income	Decrease in earnings per share
25 bps increase in annual interest rate	$ (162,896)	$ (0.01)	$ (199,500)	$ (0.01)

Credit risk

Credit risk is the risk a counterparty would be unable to pay amounts due to the Corporation in accordance with the terms and conditions of the debt instruments. As at June 30, 2012 and March 31, 2012, the Corporation is subject to credit risk concerning cash, amounts due from brokers, trade accounts receivable, and to the extent that certain open cash contracts for grain commodities as at those dates gave rise to unrealized gains thereon. The maximum exposure to credit risk on those assets is limited to the carrying value of those assets.

Riverland Ag uses various grain contracts as part of its overall grain merchandising strategies. Performance on these contracts is dependent on delivery of the grain or a customer buy-out. There is counter-party risk associated with non-performance, which may have the potential of creating losses for the Corporation. The Corporation's management has assessed the counter-party risk and believes that insignificant losses, if any, would result from non-performance.

Riverland Ag regularly evaluates its credit risk concerning its trade accounts receivable to the extent that such receivables may be concentrated in certain industries or with significant customers. Riverland minimizes this risk by having a diverse customer base and established credit policies. The aging of Riverland Ag's trade accounts receivable are substantially current. Based on its review and assessment of its trade accounts receivable, management of Riverland Ag has determined that no allowance for doubtful accounts is warranted, and management is confident in its ability to collect outstanding trade accounts receivable.

Revolving credit facility (Note 7)

This credit facility has certain covenants, including the maintenance of:

(a) the ratio of “consolidated debt” to “consolidated tangible net worth” (as defined by the agreement) of not more than 4.0 to 1.0;
(b) consolidated working capital of not less than USD$30 million; and
(c) consolidated tangible net worth of not less than USD$70 million.

Secured term loans (Note 8)

The term loans are subject to the following restrictive debt covenant requirements:

(a) a ratio of “liabilities” to “tangible net worth” (as defined by the agreement) of 2.5 to 1.0 or more;
(b) consolidated working capital of not less than USD$30 million;

As at June 30, 2012 and March 31, 2012, Riverland Ag complies with debt covenants for the revolving credit facility and the secured term loans.

15. SUBSEQUENT EVENTS

Renewal of revolving line of credit facility

On July 31, 2012, Riverland Ag renewed its committed revolving credit agreement (Note 7) for an additional two years. The amount of the revolving line of credit facility remains USD$180 million, and there is no change in the identity of the guarantors of the facility. The credit agreement is subject to borrowing base limitations. The revolver is secured by predominantly all assets of Riverland Ag, including cash but excluding property, plant, and equipment.

Borrowings will bear interest at LIBOR plus 3.75%. Interest will be calculated and paid monthly. Amounts under the credit agreement that remain undrawn will be subject to commitment fees on a graduated scale, which will be payable quarterly in arrears on the average daily undrawn amount. The renewed revolving credit facility has certain covenants, including the maintenance of the ratio of “consolidated debt” to “consolidated tangible net worth” (as defined by the agreement) of not more than 4.00 to 1.00, consolidated minimum working capital of not less than USD$50 million, and consolidated tangible net worth of not less than USD$90 million. The revolving credit facility will also subject to a “debt service coverage ratio”, which will also apply to the long-term debt facilities described in Note 8, as follows:

a) a minimum ratio of 0.60 to 1.00 for the quarter ending September 30, 2012;
b) a minimum ratio of 0.65 to 1.00 for the quarter ending December 31, 2012;
c) a minimum ratio of 0.70 to 1.00 for the quarter ending March 31, 2013;
d) a minimum ratio of 1.25 to 1.00 for the quarter ending June 30, 2013; and
e) a minimum ratio of 1.50 to 1.00 thereafter.

Restricted cash deposit

On August 1, 2012, Riverland Ag opened a cash account with Great Western Bank (“GWB”), its lender under the long-term facility, and deposited cash of USD$7.6 million. This amount represents the aggregate of principal and interest payments due until July 31, 2013 on the Company’s long-term debt. The deposit is restricted, and GWB will withdraw funds from this account on a monthly basis, as and when principal and interest payments are due.

16. COMPARATIVE FIGURES

Comparative figures concerning personnel costs included in Cost of sales and in General and administrative expenses, as previously reported as “Supplemental disclosure of selected information” in the interim condensed consolidated statement of comprehensive income for the quarter ended June 30, 2011, have been reclassified for that quarter. Previously reported figures included amounts only for Riverland’s contribution to the 401(k) plan for the period. Reclassified figures also now include other personnel costs also recorded in Cost of sales that were inadvertently omitted. These reclassifications have no effect on net income for that period.
